

Welcome to our 4th Newsletter

**In this issue :**

- **We Tomorrow and Covid**
- **WT Virtual Packs for Seniors**
- **C2 WT training in Marseilles**
- **Dissemination Caravan**

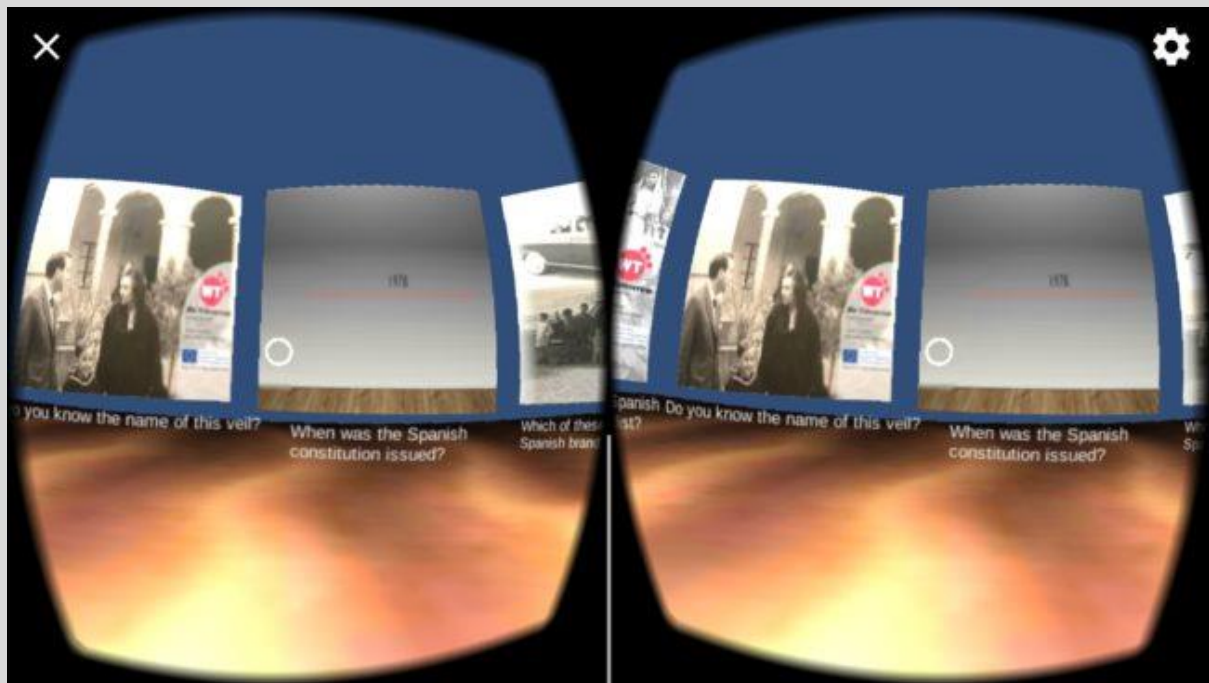

**We Tomorrow and Covid**

We Tomorrow is a project that is addressed to young people and seniors and the last ones have suffered a lot during the pandemic, many of them have died and to protect them their isolation has increased. This last newsletter wants to be a tribute to them.

## WT Virtual Packs for Seniors

We Tomorrow Packs to help seniors to stimulate their memory by creating a virtual tour around pictures of their past are ready and freely available on our website. <http://we-tomorrow.eu/io2-virtual-reality-packs/>

## C2 WT training in Marseilles

Last June We Tomorrow C2 was held finally in Marseilles . It was a blended mobility as most of the partners could not travel because of Covid restrictions in their countries in spite of all difficulties it was a success and participants were able to create the last apk that shows images and questions of their countries and they learnt about other cultures .

Moreover , members of ACAM TRADERS AND CRAFTSMEN ASSOCIATION OF BELSUNCE joined our training .

## Dissemination Caravan

Covid restrictions generated innovation in the project . The project originally wanted to customise an old caravan that was planned to travel around the countries but travel restrictions did not allow us to do that so thanks to Paul Mckillop from IOW College WT 3D Caravan made with recycled material was made.
